1855.

—
VICTORIA.

BIRTHS, DEATHS, AND MARRIAGES

IN THE

COLONY OF VICTORIA.

Second Annual Report of the Registrar General.

*L*AID upon THE COUNCIL TABLE by THE CHIEF SECRETARY, by command of HIS
EXCELLENCY THE GOVERNOR, and ordered by THE COUNCIL to be printed, 20TH
DECEMBER, 1855.

By Authority :

JOHN FERRES, GOVERNMENT PRINTER, MELBOURNE.

SECOND ANNUAL REPORT.

Registrar General's Office,
Melbourne, 12th December, 1855.

SIR,

I have the honor of submitting to you for the purpose of being laid before the Legislative Council, a General Abstract of the Births, Deaths, and Marriages registered in the Colony of Victoria during the year ending 30th June, 1855.

2. It will be observed that the numbers registered during the year throughout the Colony, were:—

Births	-	-	-	-	-	10,210	Appendix, Table I.
Deaths	-	-	-	-	-	6,572	Appendix, Table III.
Marriages	-	-	-	-	-	3,798	Appendix, Table II.

3. The number of births registered is more than double that of the preceding year, in which only 4499 were recorded. This satisfactory result may be attributed in some measure to the success which has attended the exertions made to extend and improve the working of the system, and to the activity and intelligence displayed by the Deputy Registrars, and also to the increasing desire manifested by parents to secure for their children the advantages derivable from registration.

BIRTHS.

4. The quarterly registration of births gives the following results. The numbers registered in the several quarters in the years 1853-4 and 1854-5 were:—

	1853-4. (a)	1854-5. (b)	
September 30th	- - 575	- - 2292	(a) 1853-4—Registrar General's First Report, sec. 31.
December 31st	- - 919	- - 2232	(b) 1854-5—Appendix, Table I., present Report.
March 31st	- - 958	- - 2598	
June 30th	- - 2047	- - 3088	
	<hr/> 4499	<hr/> 10,210	

5. From the returns which accompany the Report, it will be seen that the proportion of male to female births varies from that observed in the previous year, being 103 males to 100 females born in 1854-5, while in 1853-4 the numbers were 107 males to every 100 females.

Registrar General's
First Report, sec. 31.

6. Ninety-three cases of twins occurred among the births during the year; of these 103 were males and 81 were females. Two cases of triplets are recorded, and of these two were males and four females. The number of illegitimate births registered was 116, equally divided between the sexes, being 58 males and 58 females.

MARRIAGES.

Registrar General's
First Report, sec.
34.
Appendix, Table II.,
present Report.

7. If the number of marriages may be taken as an index of the general condition of the people as regards their material comfort and prosperity, it will be satisfactory to observe that notwithstanding the depressing circumstances of the Colony during the period under review, the number of marriages has increased from 3342 in the previous year, to 3798 in 1854-5.

8. It is remarkable how equally these marriages appear to have been distributed over the various periods of the year. Thus the number which took place in each quarter of the two succeeding years was found to be:—

	1853-4.		1854-5.
Quarter ending 30th September	- 625	-	- 979
„ 31st December	- 889	-	- 955
„ 31st March	- 929	-	- 905
„ 30th June	- 899	-	- 959
	<hr/> 3342		<hr/> 3798

9. The youngest male married was 18 years old, the oldest 62; the youngest female married was aged $13\frac{1}{2}$ years, the oldest 65. The number of widowers who re-entered the married state was 429, of widows 387. Sixty-five per cent. of the total number of females married were under the age of 25 years, and sixty-three per cent. of the males were married between the ages of 21 and 30.

Appendix, Table II.,
present Report.

10. The application of the test of “signatures to the marriage registers” affords a similar satisfactory result as to the state of education, so far as regards the ability to write among the adults, to that which was found by the returns of the previous year. The number of males who signed with marks only, was about 12 per cent., and of the females 28 per cent. In England, in 1849, the proportion of males who thus signed was 31 per cent., and of females 46 per cent. The comparison continues therefore to disclose an educational condition among the adults highly gratifying and most important to the Colony.

DEATHS.

11. While so large a portion of the population continues perpetually moving about from one gold field to another, many deaths must of necessity remain unregistered, notwithstanding the endeavors which have been made to meet this evil by subdividing existing districts and by appointing additional Deputy Registrars to fresh localities, wherever the mining population were found to have fixed their residence long enough to admit of the arrangement. Taking the Colony generally, however, I am happy to bear testimony to the zeal and intelligence with which the Deputy Registrars have exerted themselves to secure a complete registration.

12. With this conviction, therefore, it is with great satisfaction I have to report that, notwithstanding the increase of population by immigration and by the number of births, which, as before observed, have doubled, there have been but 6572 deaths recorded during the year, being only 746 cases more than in the previous year. The following comparative statement will shew the mortality of the two years:—

	1853-4. (a)	1854-5. (b)	
Males - - -	3589 - - -	4076	(a) Registrar General's First Report, sec. 42.
Females - - -	2237 - - -	2496	(b) Registrar General's present Report, Appendix, Table III. (a) and (b).
Totals - - -	5826 - - -	6572	

13. In Melbourne and its suburbs, comprising the district within a circle of ten miles, the deaths registered in the two years were as follows:—

	1853-4. (a)	1854-5. (b)	
Males - - -	2394 - - -	2091	(a) Registrar General's First Report, sec. 43.
Females - - -	1632 - - -	1453	(b) Appendix, Table IV. (a) and (b), present Report.
Totals - - -	4026 - - -	3544	

being 482 less in 1854-5 than the number recorded in the previous year.

14. Thus it will be seen that while there has been a slight increase in the number of deaths throughout the Colony, there has been a decrease of mortality within the Melbourne district. There are not at present sufficient data on which to ground any opinion as to how far this may be the result of an improvement in the salubrity of the city, and in the habits of the people, or of a diminution in the number of the inhabitants by the removal of families to the country districts, in consequence of the commercial depression which prevailed during a large portion of the period under review. Probably each of these causes may have influenced the result, and it is certain that many of the evils attendant on an excessive immigration into a city insufficiently provided with house accommodation for so many thousands of strangers, to which in my last report I drew attention, no longer exist. At the same time it will be found, from whatever cause the increase may have arisen, that the registered number of male and female deaths has nearly doubled in the districts beyond Melbourne and its suburbs.

15. From the accompanying returns it will be observed, that, of the total number of deaths from all causes which have occurred in the Colony, about one-third resulted from zymotic, i.e., *endemic, epidemic, and contagious* diseases. In England and Wales the average is little more than one-fifth. In this Colony the proportion, as stated in my First Annual Report for the year 1853-4, was nearly 40 per cent. out of every 100 males who died, and nearly 45 per cent. out of the females. This year it is for the former 31·575 and for females 35·616 per cent., shewing a reduced degree of intensity in regard to preventable diseases. Of the 2176 deaths under this class no less than 1184 were those of children under five years of age.

Table V. (a) and (b), compared with Tables VI. and VII. of Registrar General's First Report.

Appendix, Table III.

Registrar General's First Report, sec. 47.

Appendix, Table III. (a) and (b).

Appendix, Table III.

Appendix, Table VI.

16. *Dysentery*, *diarrhœa*, and *typhus* have carried off four-fifths (81 per cent.) of this class in the Melbourne district; the respective per centages being as follows:—*Dysentery*, 43; *diarrhœa*, 18; *typhus*, 20. Last year there were 262 cases of measles, constituting 14·5 per cent of the zymotic class; in the present year there were four cases only. The tables for 1853-4 shewed that *scarlatina* had proved fatal in 85 cases; the following tables shew but 26.

Appendix, Table VI.

Appendix, Table VII.

17. In the country beyond the Melbourne district, *dysentery*, *diarrhœa*, and *typhus*, formed 90 per cent. of the zymotic class; and the results as to *measles* and *scarlatina*, present the same favorable character as in the metropolitan district.

18. No cases of deaths from *small pox* or *hydrophobia* have been registered.

Appendix, Table VI.

19. In the month of September, 1854, an epidemic prevailed among the Chinese, who had recently landed in Melbourne from a long sea voyage; by it 40 of these people perished, and 10 additional fatal cases of a similar type were registered in the month of January following. The nature of this disease was at first considered as very doubtful, but it has been since pronounced to be sea scurvy.

Appendix, Table III.

20. Under the head "Diseases of uncertain or variable seat," the mortality throughout the Colony appears to have been 14·4 per cent. of the total number of deaths from all causes. The deaths recorded were 948, and of these 567 occurred in the first year of life; debility and atrophy formed the cause of death in three-fourths of the cases both in Melbourne and in the remainder of the Colony. A similar result was observed in the previous year.

Appendix, Table III.

Appendix, Table VI.

21. The deaths from "Diseases of the nervous system," form 13·7 per cent. of the mortality from all causes, for both sexes throughout the Colony. The total number of cases was 901, of which 589, or nearly two-thirds, consisted of children under five years of age; and of these, 412 died within twelve months after their birth. More than half of these resulted from *convulsions*, and *hydrocephalus* (or *water on the brain*). The deaths from *delirium tremens*, in Melbourne and suburbs, have decreased this year to the extent of more than one-half; while in the remainder of the Colony there has been but one case more than in the previous year, notwithstanding the increase of the population. There were nine fatal cases of *coup de soleil*, or sunstroke, in the Melbourne district, and four more were recorded in the country.

Appendix, Table III.

Appendix, Table VI.

Appendix, Table VII.

22. The same favorable results are to be found as in the previous year, under the head of "Diseases of the respiratory organs," the number of deaths forming only 12·3 per cent. of the whole mortality of the Colony. In Melbourne and suburbs *phthisis pulmonalis* formed 57 per cent. of the total of this class of diseases, or 277 out of 484 cases, and *pneumonia* 27 per cent., or 130 cases. In the remainder of the Colony, *phthisis* formed 44·5 per cent., and *pneumonia* 36 per cent. The deaths from *bronchitis* were 8·5 per cent. of the class in Melbourne, and 11·5 per cent. in the remainder of the Colony.

Appendix, Table III.

23. "Diseases of the organs of circulation" constituted 2·03 per

cent. of the whole mortality, *diseases of the heart* being the chief cause of death under this head.

24. The mortality under the head of "Diseases of the digestive organs," or 9.66 of the total deaths in the Colony, amounted to 635 cases, Appendix, Table III.
429 of which occurred among children under two years of age; of these 268 Appendix, Tables VI.
died from *teething*. There were 82 fatal cases of *tabes*, and 116 of *enteritis*. and VII.

25. Only 23 cases of death from "disease of the urinary organs" Appendix, Tables VI.
have been recorded, and 68 from "diseases of the generative organs;" of and VII.
the latter, 66 resulted from *childbirth*. From "diseases of the locomotive Appendix, Tables VI.
organs" 24 deaths have occurred; and from "diseases of the integumentary and VII.
system" only 6. There were 40 deaths from "*old age*" registered. One Appendix, Tables VI.
male died between the ages of 90 and 95, and the oldest female between and VII.
95 and 100.

26. The deaths from "external causes" throughout the whole Colony Appendix, Table III.
formed 9.4 of the total mortality. The deaths registered as arising from "*in-*
temperance" amounted to 45; and there were 538 *violent deaths*, principally Appendix, Tables VI.
by drowning and other accidents, which cannot be more precisely described and VII.
in consequence of the vague terms which have usually been employed in the
verdicts returned by inquest juries. It is greatly to be desired that Coroners,
when giving information in such cases to the Deputy Registrars, would add
such particulars as may afford a just idea of the precise nature of the cause
of death.

27. In connection with this subject I would again urge upon medical
practitioners the necessity and importance of lending their aid to this depart-
ment, by giving in every instance an authentic name of the fatal disease, and
by furnishing as precise information as possible of the causes of death, both
primary and secondary, in accordance with the recommendation of the
Presidents of the Royal Colleges in 1837, which will be found in the Appendix
to the Fourth Annual Report of the Registrar General of England, and re-
published in the "Statistical Register of Victoria."

28. My First Annual Report, laid upon the Legislative Council table on
the 4th May, 1855, contains a full explanation of the duties carried on in this
department, and of the mode of procedure observed in conducting the
business in its various branches of *Registration of Births, Deaths, and Mar-*
riages, Statistics, Blue Books, Patents, and Census. Beyond extending the
agency of the system whenever it has been found practicable, and a reduction
of the remuneration of the Deputy Registrars to an uniform rate of half-a-
crown per entry, but little alteration has since taken place. Additional duties
have, however, been imposed upon this department by the "*Compulsory*
Vaccination Act;" these comprise the necessary correspondence connected
with the registration, the supply of forms, the keeping of many separate
accounts, and providing the medical men with vaccine lymph.

29. The total number of Deputy Registrars is 134, and the number Appendix A.
of Ministers of Religion, with whom this Office is in regular correspondence
on the subject of their marriage registers, amounts to 188.

30. The second portion of the Census returns of April, 1854, con-

taining the tables and distribution of the several religious denominations in the Colony, has formed the subject of a distinct Report, and was laid on the Council table on the 28th November, 1855.

31. In my Report for the year 1853-4, I stated that it was my intention to propose a trial of the experiment of collecting through the medium of the Deputy Registrars, instead of that of the Police Constables, the materials required for the compilation of the Blue Books and Statistical Returns of the Colony. This proposition has since been acted upon, and with a degree of success which warrants much hopefulness for the future, and fully justifies me in repeating my belief, "that the future more frequent employment of those officers in the public service might be turned to very valuable account in a country so deficient as this Colony is in the machinery of parochial and municipal institutions."

I have the honor to be,

Sir,

Your most obedient servant,

NORMAN CAMPBELL,

Registrar General.

The Honorable the Chief Secretary,

&c., &c., &c.

APPENDIX.

Avenel	William Norris.	Horsham	H. S. Palmer.
Avoca	F. R. Lempriere.	Kalkallo	H. C. Ellerman.
Bacchus Marsh	J. S. Cooper.	Kangaroo Ground and } County Evelyn	Peter Crichton.
Ballaarat	W. T. Pooley.	Keilor	Andrew Ross.
Barrow's Inn		Kilmore	Nicholas Brennan.
Beechworth... ..	J. W. Walden.	Kyneton	F. W. C. Beavan.
	W. G. Brett.	Lockwood	Andrew Strahan.
	W. E. Wheeler.	Maldon	Andrew Inglis.
	Thomas Brown.	Maryborough	J. N. Wood.
	Henry De Little.		Samuel Barrett.
Belfast	Henry Gottreux.	Melbourne	E. B. Arnold.
	Marcus Macartney.		Thomas Sunderland.
	Charles McKnight.	Mitchell River	F. Jones.
	John Ware.	Mount Blackwood... ..	Cæsar Kieser.
Bellarine	A. W. Bailey.	Ditto (Red Hill)	Richard Bunce.
Benalla	F. G. Hinsby.	Mount Garvoc	P. T. B. Lang.
Brighton	William Barton.	Mount Korong	James Morish.
Ditto (Oakleigh)	Edward Lawrie.	Mount Moriac	Thomas Rea.
Broadmeadows	G. S. Harris.	Murchison	George Thompson.
Brunswick	Joseph George.	Northcote	R. G. Wilson.
Buckland		Point Nepean	J. Reed.
Bulla	Samuel Lazarus.		
Buninyong	W. B. Rankin.	Portland	Edward McKenna.
Campbellfield	Andrew Hanna.		M. McLean.
Carisbrook	W. F. Roe.		John Stock.
Casterton	George Cue.		Henry Townsend.
Castlemaine	A. J. Landon.	Prahran	John Tulloch.
	H. H. Dearsly.		Thomas Hillas.
Chepstow	James Crisp.	Queenscliff	Charles Dod.
	Francis Ormond.	Raglan	Robert Tassell.
Colac	J. S. Farrer.	Richmond	W. H. Lagoe.
	J. B. Farrer.	Sale... ..	H. B. C. Marlay.
Coleraine	George Trangmar.		J. T. Sanders.
Collingwood	Samuel Allen.		Adolphus Barnett.
Cranbourne and Dandenong	Alexander Duff.	Sandhurst	John Hutchinson.
Creswick	James Edmonston.		William McEwen.
	James Mackay.		W. A. Roche.
Crowlands	Robert Hamilton.	Sandy Creek	W. Brown.
	John Peermann.	St. Kilda	F. T. Van Hemert.
Dean's Marsh		Swan Hill	J. T. Morris.
	George Currie.	Timboon	R. McPherson.
	J. Brown.		David McPherson.
	Nicholas Cole.		H. M. Wilson.
Elephant Bridge	Angus Craig.	The Leigh	John Elder.
	John Manifold.		William Elder.
	Peter McArthur.	Wangaratta	D. M. McNab.
	James Ross.		A. L. Ely.
	J. G. Ware.		Charles Watkins.
Emerald Hill and Sandridge	Andrew Plummer.		Francis Beggs.
Flemington... ..	T. J. Vallance.	Wardy Yallock	John Chirnside.
Franklyn River	S. Martin.		John Gow.
Fryerstown	H. B. Armstrong.		S. Matthews.
	James Quinan.	Warringal	William Rowe.
Geelong	John Cuttle.		G. F. Bartrop.
Gisborne	Richard Haines	Warrnambool	J. M. Ardlie.
Glenorchy			Daniel Curdie.
	Richard Garton	Williamstown	Edmund Burke.
Grange	D. B. Craig.	Wimmera	J. M. Clow.
	G. W. Elms.	Winchelsea	J. E. Robinson.
Harrow	B. B. Creagh.	Woodford	Alexander Schultze.
Ditto (Balmoral)	James Galbraith.	Woollert	Thomas Dignan.
Hawthorn	J. de L. Bragge.	Yackandandah	
	J. L. Rees.	Yan Yean	William Latham.
Heathcote	H. C. Peters.	Yarra Bend	Robert Bowie.
